PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Engineer with 3+ years of experience building scalable, production-grade web applications. Specialized in ASP.NET Core (C#) and React/TypeScript with a strong foundation in RESTful API design, relational database architecture, and cloud-ready system patterns. Proven ability to lead end-to-end software delivery - from requirements through deployment - including multi-tenant SaaS features, concurrency-safe transactional systems, and role-based access control. Holds a First-Class B.Sc. in Computer Science (CGPA 3.98/4.00). Actively seeking a Senior Software Engineer role to architect and deliver enterprise-quality .NET and React solutions.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, Python, PHP, SQL

Frameworks: ASP.NET Core, Entity Framework Core, React.js, Next.js, FastAPI, Laravel, CodeIgniter

Front-End: React, TypeScript, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap

Back-End: .NET 8, ASP.NET Core Web API, REST, SignalR, Middleware pipelines

Databases: PostgreSQL, MySQL, MS SQL Server, Entity Framework Migrations

DevOps / Tools: Git, GitHub Actions, Docker (basics), CI/CD, Postman, Jira, Agile/Scrum

Architecture: Multi-tenant SaaS, RBAC, Clean Architecture, Repository Pattern, CQRS

IT Support: Tier 1/2 support, Active Directory, hardware/network troubleshooting, knowledge-base docs

WORK EXPERIENCE

IT Support & Web Developer · StudyNet Pty Ltd · Dhaka *Nov 2025 – Present*

- Lead full-stack development of Scholly, a multi-tenant SaaS platform - RESTful APIs with ASP.NET Core, React front-end components, MySQL data models, and RBAC/tenant isolation following Clean Architecture.
- Integrated Bitrix24 for workflow automation via its REST API, enabling event-driven state transitions and audit logging across the application lifecycle.
- Design, develop, and deploy new features and modules for existing PHP (CodeIgniter) web applications; perform routine maintenance, debugging, and performance optimization of production websites.
- Manage and optimize MySQL databases for data integrity and query performance; built 20+ RESTful API endpoints and cut response times by ~35% with indexed schemas.
- Provide Tier 1 and Tier 2 technical support for internal users, resolving hardware, software, network, and connectivity issues.
- Administer user accounts, permissions, and security policies in Active Directory; document support processes and common solutions in a knowledge base.
- Gather requirements from stakeholders and translate them into technical specifications; enforce code quality, security, and Git version-control practices.

Assistant IT Officer & Developer · StudyNet Pty Ltd · Dhaka *May 2023 – Nov 2025*

- Developed and enhanced a CodeIgniter-based CRM, adding modules for lead management, application tracking, and third-party data integration.
- Contributed front-end features using React, HTML/CSS, and JavaScript, improving UX for internal stakeholders managing 1,000+ student records.
- Documented sprint progress, tracked development tasks in Jira, and communicated updates to cross-functional stakeholders.
- Configured and maintained ERP/CRM integrations and authored technical documentation that reduced onboarding time for new developers.

Customer Support Administrator · Click Communication · Dhaka *Feb 2016 – Jan 2018*

- Acted as liaison between customers and product teams, translating technical feedback into product improvement tickets.
- Analyzed support data to identify recurring issues; contributed to a 20% reduction in escalation rate through process improvements.

KEY PROJECTS

TimeSlot - Appointment Booking System *C# · ASP.NET Core · React · TypeScript · PostgreSQL*

- Designed and built a full-stack booking platform with UTC-normalized storage using IANA timezone identifiers, ensuring accurate cross-timezone scheduling.
- Implemented database-level concurrency control (optimistic locking) to prevent overlapping bookings under concurrent load, achieving fully idempotent booking flows.
- Engineered atomic rescheduling transactions with retry-safe semantics; exposed a clean React/TypeScript UI for booking management.

DataBridge Inspector - Data Normalization Tool *Python · FastAPI · React · TypeScript*

- Built a full-stack CSV normalization tool with React-driven column mapping UI, field-level preview, and formula-injection protection on export.
- Implemented duplicate detection with reasoning engine and enforced file-size/row-count guards on the FastAPI backend.

WorkflowDesk - Multi-Tenant Inquiry Management *PHP · Laravel · Vue · TypeScript · MySQL*

- Architected a multi-tenant SaaS system with Laravel Policies for tenant/role boundary enforcement and transactional state-change audit events.
- Implemented navigation-preserving pagination with stale-update conflict handling to ensure data consistency across concurrent users.

EDUCATION

B.Sc. in Computer Science and Engineering *2018 – 2022*

United International University, Dhaka · CGPA: 3.98 / 4.00 · Summa Cum Laude · Multiple Full Scholarships

AWARDS & ACHIEVEMENTS

- Summa Cum Laude - ranked top of cohort; multiple 50–100% academic scholarships throughout B.Sc.
- Champion, CSE Project Show 2019 (Electronics) - UIU; Runners-Up, UIU Science Fair 2020.
- Certifications: Python, Data Science & Dart (Udemy, 2023); GED (2015).
